

## A Hole in One Lighting Design!

Lumen Solutions was able to successfully turn old world charm into modern day savings at St. George's Golf & Country Club. Inspired by English architecture, this 90 year old clubhouse showcases numerous different lighting types, including chandeliers and wall sconces. Our team invested the time to find the right LED products to compliment the different antique light fixtures and unique spaces, such as their six-sheet curling rink.

We enhanced the overall atmosphere by not only increasing lighting levels, but by adding dimmer functionality. Older first generation LED lights were upgraded in key areas, like the men's locker room. The project was so successful, Lumen Solutions was asked back to upgrade additional areas, including the historic Pro Shop. The result, St. George's Golf & Country Club saw an annual savings of \$16,813 with a payback period of 2.7 years.

Opened in 1929, St. George's Golf and Country Club is a world-renowned golf course and country club located in Etobicoke, Ontario. In 2020, Golf Digest listed it as one the top 100 golf courses in the world and the third best in Canada.
